Sustainable Future for Human Security Benjamin McLellan 2017-10-26 This book focuses on the human and societal aspects of sustainable development. Three major perspectives are considered: governance and its influence on sustainable development; urban environments and their broader human and environmental impacts; and disaster management. Each of these elements is critical in considering the current and prospective development of societies towards a sustainable future in which human security is guaranteed. This 2-volume set discusses a wide range of topics concerning sustainability and human security in Asia, particularly South East Asia. The individual chapters have been contributed by authors from various fields, and due to the breadth of the material are separated into two thematic volumes. The set offers a valuable resource for professionals and researchers in the urban planning industry, postgraduates, policymakers, government officials and natural resources managers. In addition, it can be used in courses on Environmental Engineering, Agriculture and Forestry, Public Policy and Earth Science.

South Asia Economic Focus World Bank 2019-10-12 The South Asia Economic Focus is a biannual economic update presenting recent economic developments and a near term economic outlook for South Asia. It includes a Focus section presenting more in depth analysis of an economic topic of relevance for stability, growth and prosperity in the region as well as country briefs covering Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka. It concludes with a data section providing key economic indicators for South Asia "at a glance". Overall, it aims at providing important background information and timely analysis of key indicators and economic and financial developments of relevance to World Bank Group operations and interaction with counterparts in the region, particularly during annual and spring meeting.

Ecosystem Services, Biodiversity and Environmental Change in a Tropical Mountain Ecosystem of South Ecuador Jörg Bendix 2013-07-09 An interdisciplinary research unit consisting of 30 teams in the natural, economic and social sciences analyzed biodiversity and ecosystem services of a mountain rainforest ecosystem in the hotspot of the tropical Andes, with special reference to past, current and future environmental changes. The group assessed ecosystem services using data from ecological field and scenario-driven model experiments, and with the help of comparative field surveys of the natural forest and its anthropogenic replacement system for agriculture. The book offers insights into the impacts of environmental change on various service categories mentioned in the Millennium Ecosystem Assessment (2005): cultural, regulating, supporting and provisioning ecosystem services. Examples focus on biodiversity of plants and animals including trophic networks, and abiotic/biotic parameters such as soils, regional climate, water, nutrient and sediment cycles. The types of threats considered include land use and climate changes, as well as atmospheric fertilization. In terms of regulating and provisioning services, the emphasis is primarily on water regulation and supply as well as climate regulation and carbon sequestration. With regard to provisioning services, the synthesis of the book provides science-based recommendations for a sustainable land use portfolio including several options such as forestry, pasture management and the practices of indigenous peoples. In closing, the authors show how they integrated the local society by pursuing capacity building in compliance with the CBD-ABS (Convention on Biological Diversity - Access and Benefit Sharing), in the form of education and knowledge transfer for application.

Irregular Migrant Domestic Workers in Europe Anna Triandafyllidou 2016-05-06 With specific attention to irregular migrant workers - that is to say, those without legal permits to stay in the countries in which they work - this volume focuses on domestic work, presenting studies from ten European countries, including Belgium, France, Germany, Greece, Ireland, Italy, the Netherlands, and Spain. Offering a comparative analysis of irregular migrants engaged in all kinds of domestic work, the authors explore questions relating to employment conditions, health issues and the family lives of migrants. The book examines the living and working conditions of irregular migrant domestic workers, their relations with employers, their access to basic rights such as sick leave, sick pay, and holiday pay, as well as access to health services. Close consideration is also given to the challenges for family life presented by workers' status as irregular migrants, with regard to their lives both in their countries of origin and with their employers. Through analyses of the often blurred distinction between legality and illegality, the notion of a 'career' in domestic work and the policy responses of European nations to the growth of irregular migrant domestic work, this volume offers various conceptual developments in the study of migration and domestic work. As such, it will appeal to sociologists, political scientists, geographers and anthropologists with interests in migration, gender, the family and domestic work.

Community/Public Health Nursing - E-Book Mary A. Nies 2014-08-18 Covering the nurse's role in promoting community health, Community/Public Health Nursing, 6th Edition provides a unique 'upstream' preventive focus and a strong social justice approach in a concise, easy-to-read text. It shows how you, as a nurse, can take an active role in social action and health policy - especially in caring for diverse and vulnerable population groups. Written by community health nursing experts Mary A. Nies and Melanie McEwen, this book offers clinical examples and photo novellas showing how concepts apply to the real world, and describes the issues and responsibilities of today's community and public health nursing. UNIQUE! 'Upstream' preventive focus addresses factors that are the precursors to poor health in the community, addressing potential health problems before they occur. UNIQUE!

Emphasis on community aspects in all steps of the nursing process highlights the community perspective in all health situations. UNIQUE! A 'social justice' approach promotes health for all people, including vulnerable populations. UNIQUE! Photo novellas use photographs to tell stories showing real-life clinical scenarios and applications of important community health nursing roles. Research Highlights boxes show the application of research studies to the practice of community nursing. Clinical examples offer snippets of real-life client situations. Case Study: Application of the Nursing Process feature presents practical and manageable examples for the theory, concepts, and application of the nursing process. Ethical Insights boxes highlight ethical issues and concerns that the community/public health nurse may encounter. Objectives, key terms, and chapter outlines at the beginning of every chapter introduce important concepts and terminology. NEW and UNIQUE! Veterans' Health boxes present situations and considerations related to the care of veterans. UPDATED Economics of Health Care chapter addresses the latest changes related to health care reform. UPDATED Healthy People 2020 boxes include the most current national health care objectives. UPDATED Communicable Disease chapter covers current public health surveillance and outbreaks of emerging health threats, including emerging infections (e.g., H1N1, SARS, West Nile virus).

Lemon-Aid Used Cars and Trucks 2011–2012 Phil Edmonston 2011-04-25 As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

Pro-Poor Strategies in Urban Water Provisioning Akosua Sarpong Boakye-Ansah 2021-02-25 Water utilities are the main instrument for countries to achieve universal service coverage. In pursuing universal service coverage, water utilities have turned to pro-poor water services to extend water services in low-income areas. This thesis discusses the use of pro-poor water services by water utilities in Kenya, with the intention of highlighting the dimensions of the approach that require attention of policy makers and practitioners when engaging with the concept. Based on the analysis of the technologies, financial and organisational arrangements associated with the pro-poor concept, this thesis shows that the use of pro-poor strategies allows water utilities to reduce the risks of servicing low-income areas while still claiming to fulfil their mandate of providing access to all in a commercially viable manner. The analysis also shows that rather than a decision of the water utility, the choice for pro-poor strategies emerges as the result of a consensus or compromise between the different actors that constitute the broader institutional environment in which water utilities operate. The thesis concludes that while pro-poor water services may serve the interests of water utilities and other stakeholders, in the absence of well-directed subsidies and proper monitoring they will not result in low-income households benefiting from more affordable and reliable access to water.

Service Provision and Rural Sustainability Greg Halseth 2018-10-25 Access to quality services and community infrastructure are vital parts of supporting sustainable and resilient rural and small town places. Renewing outdated infrastructure and supporting the delivery of services in rural communities present significant challenges from the constrained fiscal and policy realities of the 21st century. Drawing upon contributors from five Organization for Economic Co-operation and Development (OECD) countries, this book describes innovative service delivery and community infrastructure models that are appropriate to the contemporary rural and resource-dependent regions of developed economies. The examples show that an entrepreneurial approach to service delivery and infrastructure provision by local organizations and governments is needed. Critical economic and community development supports are crucial to assist creative and innovative sets of solutions that work for small communities. Chapters in this book argue that community development foundations for resilient rural and small town communities and regions must be co-constructed and co-delivered in partnership by both local and senior government actors, in terms of both policy and committed resources. This volume will be extremely valuable for students, scholars, and community development practitioners exploring policy-making, government initiatives, and community service provision in rural and small town places.

The Sustainable World C. A. Brebbia 2011 This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology (WIT) dealing with sustainability, the environment and ecological issues. The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions. Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems. Specialisation, while required in our culture, needs to be kept under control by the understanding of the whole, which leads to the need of relying on interdisciplinary teams. Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners. This collaboration needs to be effective and to produce results that will lead to a better world. For this to happen, it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other. Furthermore, they need to understand the social and economic aspects of a given problem, in addition to the scientific and engineering issues involved. The Wessex Institute of Technology (WIT) has a long and very successful record in organising

interdisciplinary conferences. The papers in this book are a reflection of the proceedings of some of those meetings.

The Development of Children and Adolescents Penny Hauser-Cram 2013-11-25 The Development of Children and Adolescents, by Penny Hauser-Cram, J. Kevin Nugent, Kathleen Thies, and John F. Travers, provides an integrated view of child development. Presenting the most pertinent research for each developmental stage and linking this to practical applications in the areas of Parenting, Policy, and Practice, this balanced approach emphasizes the relationship between research and theory and applications. The rich media program, including WileyPLUS with Real Development promotes active learning and allows for increased understanding and comprehension of the course content. Real Development, authored by Nicole Barnes, Ph.D., Montclair State University and Christine Hatchard, Psy.D., Monmouth University, uses authentic video showcasing real families, along with activities and assessments that put students in the place of a professional, to gain an understanding of key concepts. Through the combination of text and media, students are engaged in meaningful learning that deepens and enriches their understanding of developmental concepts. WileyPLUS sold separately from text.

Engaging Men in the Fight against Gender Violence Jane Freedman 2012-12-05 Gender-based violence is a global phenomenon which affects millions worldwide. However, despite the increasing attention which is now paid to this violence by policy makers data seem to indicate that these efforts are not having as great an impact as may have been hoped. In all countries of the world, reports of gender-related violence remain elevated, whilst many incidents of such violence probably remain unreported due to fear of stigma or reprisals for those who are victims. One of the problems in tackling gender-based violence has been that for too long men have been ignored as part of the solution. Men are often labelled as perpetrators of violence, but they are perhaps too infrequently considered also as potential victims, or as partners and actors in the fight against violence. Constructions of masculinities are not adequately studied to analyse how dominant forms of masculinities may contribute to cycles of violence, and may also oppress and traumatise men themselves. This volume aims to address critically the issues of men, masculinity and gender-based violence, asking how men can be fully engaged in the prevention of gender-based violence, and how this engagement can strengthen prevention initiatives.

Grand Challenges for Social Work and Society Rowena Fong 2017-12-18 The Grand Challenges for Social Work Initiative (GCSWI), which is spearheaded by the American Academy of Social Work and Social Welfare (AASWSW), represents a major endeavor for the entire field of social work. GCSWI calls for bold innovation and collective action powered by proven and evolving scientific interventions to address critical social issues facing society. The purpose of GCSWI was modeled after the National Academy of Engineering, which aimed to identify some of the most persistent engineering problems of the day and then put the attentions, energies, and funding of the entire field to work on them for a decade. The GCSWI does the same for social issues, tackling problems such as homelessness, social isolation, mass incarceration, family violence, and economic inequality. Grand Challenges for Social Work and Society is an edited book that will present the foundations of the GCSWI, laying out the start of the initiative and providing summaries of each of the twelve challenges. The 12 main chapters that form the core of the book, one on each of the dozen Grand Challenges, are written by the primary research teams who are driving each GC project.

The Albergo Diffuso Model Maurizio Drolì 2019-12-16 The hospitality model called "Albergo Diffuso" (AD), or "scattered hotel," has been engineered by Mr Giancarlo Dall'Ara and described by The New York Times as a way of bringing life back to historic towns and rural hamlets by utilizing unused rooms for tourism. This "simple but genial" model devised in Italy in the mid-90's received an award from the UNDP for its sustainability, but despite the spread of AD's, no peer-reviewed books have previously been published in English focusing on this innovation. In this book, the author therefore begins by exploring the AD as a community-based hospitality model, examining both its pros and cons. He then considers conviviality, sense of security, and other factors that Hans Magnus Enzensberger referred to as luxuries of our time for urban dwellers. These represent the key pre-requisites a location must possess to be deemed suitable for this innovation. Next, investors and co-interested private, public and not-for-profit associations are provided with a structured framework to help them achieve a defensible competitive advantage by harnessing the economic potential of valuable, rare, inimitable and non-substitutable (VRIN) resources. The final section assesses the AD as a business model, evaluating various aspects at the heart of any business plan.

Customer Service for Hospitality and Tourism Simon Hudson 2012-11-02 Customer service is of critical importance for the tourism and hospitality sector now more than ever before as customers are looking to increase value for money and are less forgiving of mediocre service. However, despite its importance, quality customer service is the exception rather than the norm in many parts of the world. Customer Service for Hospitality and Tourism is a unique text and vital to both students and practitioners as it explains not only the theory behind the importance of customer service but also acts as a guidebook for those wishing to put this theory into practice. In essence it is the 'whys' and 'hows' of customer service. It is easy to read, very current, and full of references to all the latest research from both academic and practitioner literature. Chapters cover important topics such as the financial and behavioural consequences of customer service, consumer trends influencing service, developing and maintaining a service culture, managing service encounters, the importance of market research, building and maintaining customer relationships, providing customer service through the servicescape, the impact of technology on customer service, the importance of service recovery, and promoting customer service internally and externally. Key features include: An 'At Your Service' Spotlight at the beginning of each chapter focuses on the achievements of successful individuals related to the art of customer service. Each chapter contains a 'Service Snapshot' - short, real-life cases to illustrate a particular concept or theoretical principle presented in the chapter. Detailed international 'Case Studies', which cover a variety of sectors, organizations and regions designed to foster critical thinking, the cases illustrate actual business scenarios that stress several concepts found in the chapter. They analyze customer service in the U.S., South America, South Africa, Europe, Russia, Australia, China, Canada, Korea and Dubai.

Water Services in Small Towns Klaas Schwartz 2019-05-15 The importance of small towns is gaining increased recognition as a result of two developments. The first development concerns the possible role of small towns in migration flows and urbanization. Development of small towns, in the form of improved basic services and other amenities, has been promoted in order to abate the impact of urbanization on large urban centres and to alleviate service provision pressures in major urban centers, whilst stimulating rural economies and eventually prompting social transformations. The second development concerns the targets set by the SDGs in 2015. SDG6 requires countries to ensure universal and equitable water services by 2030. This inclusive target requires that the water services needs of small towns are considered in the expansion of sustainable and equitable water services. This book aims to

contribute to the study of water services in small towns by critically examining different approaches and experiences of water supply in small towns. It brings together empirical testimonies of how the implementation of reductionist models and the perseverance of certain principles underlying these models in the water sector have yielded suboptimal results. Much remains to be done before achieving universal service coverage in small towns is likely. In order to do that, we should start speaking of small towns as a category on their own and continue the work in elaborating further what these are and how they work. In Focus – a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector.

The Art of Building a Garden City Kate Henderson 2019-08-14 The Art of Building a Garden City is a well-researched guide to the history of the garden city movement and the delivery of a new generation of communities for the 21st Century. Bringing together key findings from the TCPA's campaign work, and drawing on lessons from the first garden cities, the new towns programme and other large-scale developments, it identifies what steps need to be taken in order to deliver the highest standards of design and place making today.

Urban Resilience to Droughts and Floods Cecilia Tortajada 2020-05-21 This book focuses on policies and governance on how to build the resilience of cities to droughts and floods in the short-, medium-, and long-term. There are discussions on how cities prepare for, cope with, learn from, manage, and recover from these extreme events. The chapters also consider aspects such as changing paradigms, policy responses under uncertainty, scenario development, institutional responses, adaptive forecasting, governance perspectives, infrastructure development, overall investments, and technological innovation. The Sustainable Development Goals (SDGs) and the Sendai Framework for Disaster Risk Reduction are discussed at length. Most of the cities and regions studied are in Asia, however, cities from Oceania, Europe, Africa, and North America are also included. Analyses are not limited to cities but to the basins and regions from which urban populations obtain their resources, and on which their resilience depends. This book was originally published as a special issue of the International Journal of Water Resources Development.

Routledge Handbook of Ecosystem Services Marion Potschin 2016-01-22 The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts.
