Redesigning Manufacturing M. Beverland 2015-05-13 Manufacturing in the UK has an image problem. Although this image problem is more fiction than fact, it nonetheless has an impact on the sector's ability to attract staff, capital, and policy interest. This book redresses this situation by focusing on the real successes of the sector and the strategies used by makers to achieve sustainable results.

L'annuel de l'automobile 2020 Benoît Charette 2019-08-08T00:00:00-04:00 À l'aube de sa 20e année, L'Annuel de l'automobile vit au rythme de la perpétuelle mouvance dans le monde automobile. Nous avons repensé la mise en page et ajouté de nouvelles chroniques pour être en synergie avec les nouvelles innovations automobiles.

Everyday Lifestyles and Sustainability Fabricio Chicca 2018-04-09 The impact of humanity on the earth overshoots the earth's bio-capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a 'bottom-up' approach by calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

Deutsche Autos 1945 - 1990 Werner Oswald 2001

Brand Building and Marketing in Key Emerging Markets Niklas Schaffmeister 2015-10-09 This book combines scientific research and professional insights on brand and marketing strategy development in major emerging growth markets. It presents a detailed outline of the Brazil, Russia, India and China (BRIC) markets to understand their cultural and socio-economic complexity. With emerging markets at the center, major paradigm shifts are explained such as 'one world strategies'. The author reveals the importance of market-driven positioning that uses local differences and consumer preferences as opportunities without contradicting a corporation's global positioning. Professionals in international marketing and business strategists will find the hands-on guidance to 25 new success strategies particularly useful. This book is also a must-read for people dealing with branding and marketing in a 'globalized' world.

Lemon-Aid New Cars and Trucks 2013 Phil Edmonston 2012-12-01 Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.

The Silk Road Rediscovered Anil K. Gupta 2014-04-21 A roadmap for understanding the business challenges and opportunities in China By 2025, China and India will be two of the world's four largest economies. By then, economic ties between them should also rank among the ten most important bilateral ties worldwide. Their leaders are well aware of these emerging realities. In May 2013, just two months after taking charge, Premier Li Keqiang left for India on his first official trip outside China, a clear signal of China's foreign policy priorities. The Silk Road Rediscovered is the first book ever to analyze the growing corporate linkages between India and China. Did you know that: India's Mahindra is the fifth largest tractor manufacturer in China? Tata Motors' Jaguar Land Rover unit is the fastest growing luxury auto seller in China? India's NIIT is the most influential IT training brand in China? China's Huawei has its second largest R&D center in Bangalore and employs over 5000 people in India? Shanghai Electric earns its largest revenues outside China from India? As these developments illustrate, pioneering Indian and Chinese companies are rediscovering the fabled Silk Road which joined their nations in ancient times. Winning in each other's markets is also making them stronger and whetting their appetite for further global expansion. This book examines how Indian companies such as Tata Consultancy Services, Mahindra Tractors, NIIT, Tata Motors/Jaguar Land Rover and Sundaram Fasteners have figured out how to win in China. Their experiences may inspire and offer lessons to other Indian companies. The book also examines how Chinese pioneers such as Lenovo, Huawei, TBEA, Haier and Xinxing have made a strong commitment to India and are beginning to realize the fruits of this commitment. The key lessons that emerge from these analyses are: the odds of success go up dramatically when executives adopt a global rather than local-for-local perspective and are skillful at learning on the ground.

Auto Brand Anders Parment 2014-01-03 The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly.

Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features: • Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo • The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-stranding repair shops and professional organizations • The results of a new international study on car buyer behaviour based on 4,700 survey answers Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.
