The book focuses on how these areas of law apply to vulnerable adults, and brings together an extensive body of case law to illustrate this. Ageing, Gender and Family Law Beverley Clough 2018-03-19 This book explores the intersecting issues relating the phenomenon of ageing to gender and family law. The latter has tended to focus mainly on family life in young and middle age; and, indeed, the issues of childhood and parenting are key in many family law texts. Family life for older members has, then, been largely neglected; addressing this neglect, the current volume explores how the issues which might be important for younger people are not necessarily the same as those for older people. The significance of family, the nature of family life, and the understanding of self in terms of one's relationships, tend to change over the life course. For example, the state may play an increasing role in the lives of older people – as access to services, involvement in work and the community, the ability to live independently, and to form or maintain caring relationships, are all impacted by law and policy. This collection therefore challenges the standard models of family life and family law that have been developed within a child/parent-centred paradigm, and which may require rethinking in the turn to family life in old age. Interdisciplinary in its scope and orientation, this book will appeal not just to academic family lawyers and students interested in issues around family law, ageing, gender, and care; but also to sociologists and ethicists working in these areas.

Vulnerabilities, Care and Family Law Julie Wallbank 2013-11-26 While in the past family life was characterised as a "haven from the harsh realities of life", it is now recognised as a site of vulnerabilities and a place where care work can go unacknowledged and be a source of social and economic hardship. This book addresses the strong relationships that exist between vulnerability and care and dependency in particular contexts, where family law and social policy have a contribution to make. A fundamental premise of this collection is that vulnerability needs to be analysed in a way that gets at the heart of the differential power relationships that exist in society, particularly in respect of access to family justice, including effective social policy and law targeted at the specific needs of families in mutually dependent caring relationships. It is therefore crucial to critically examine the various approaches taken by policy makers and law reformers in order to understand the range of ways that some families, and some family members, may be rendered more vulnerable than others. The first book of its kind to provide an intersectional approach to this subject, Vulnerabilities, Care and Family Law will be of interest to students and practitioners of social policy and family law.
