Implementation of an Enterprise Resource Planning System with Focus on End-User Training Elke Simon 1999-11-24 Inhaltsangabe:Abstract: The implementation of an Enterprise Resource Planning (ERP) system refers to Information Systems, Business Processes, and People. Basically, it is a changing procedure in organizations that strive for company-wide high performance. Business Process Transformation is about changing a company's focus - from products to customers. Information Systems are replaced by a homogenous system environment which integrates all information into a common system. The behaviour and skills of the company-wide personnel are adapted to perform in the new "world". The big challenge of the implementation is to have the properly-trained people for a high-performance organization. Unfortunately, most companies do not recognize that need. They underestimate the impact that the human factor has on an ERP approach; they consider the implementation as a software-installation with influence to the business. But, the implementation is much more complex. This thesis

is dedicated to all those persons who intend to implement an Enterprise Resource Planning system, and who want to understand the theory of Business Process Transformation and how it is linked to Enterprise Resource Planning. To emphasize the importance of the human factors within the implementation, chapter 4 elaborates on End-User Training as a significant part of an implementation for a company dedicated to becoming a high-performance organization. This paper also includes a case study of an ERP implementation at Mitel Corporation. The case study presents information about the Company, its ERP implementation, and its approach to End-User Training.

complex software system must be constantly
reconfigured and upgraded to accommodate its
latest releases. Upgrading SAP provides a complete
overview of the process to upgrade from one SAP
release to the next one and explains with detailed
descriptions, the use of all relevant SAP upgrade
tools. Along with a technical description of the SAP
NetWeaver Application Server (AS), it also
discusses personnel issues and the economic
ramifications of such an upgrade project. Examples
in this book are based on various different SAP
products and releases, such as SAP NetWeaver
2004, 2004S (also known as NetWeaver 7.0 and
7.1), and SAP Business Suite 2005 with SAP ERP
6.0, BI, CRM, SCM, and SRM. Conceived as both a
teaching book and as a reference manual, it covers
all the techniques, background information, notes,

tips, and tricks needed for any SAP upgrade project. A CD-ROM accompanies the book with templates and outlines for the upgrading process, as well as third-party SAP-related material.

SAP ERP Financial Accounting and Controlling

Andrew Okungbowa 2015-06-08 SAP ERP modules

are notoriously hard to configure and use effectively without a lot of practice and experience. But as SAP ERP Financial Accounting and Controlling: Configuration and Use Management shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency

conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP’s view of the module’s key tasks and procedures—including:

- Configuring and using the general ledger and accounts payable and receivable screens
- Configuring and completing closing procedures, asset accounting, and financial reporting
- Configuring global settings and enterprise variables
- Accounting for both profit and cost centers
- Creating a house bank
- Integrating FICO with other SAP modules

Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.
