Oxford Textbook of Ophthalmology D. L. Easty 1999

The History of Modern Cataract Surgery Marvin L. Kwitko 1998 Surely the threat of blindness from whatever cause, is an event faced by an ever-growing segment of our aging population. However, when the cause was cataract formation, over the centuries a definite treatment evolved and became available to help those afflicted with this problem, from couching, through crude extra-capsular Graeffe knife extraction, intra-capsular cataract surgery, and planned extra-capsular surgery, to phacoemulsification (ultrasound or laser). Doctors, therefore, recognized very early that there was one blinding condition which could be treated and in which vision could be i.

Mastering Dalk Soosan Jacob 2019 Due to its instantaneous and visible results for patients both anatomically and visually, anterior lamellar keratoplasty is a field of great interest to corneal surgeons. Newer techniques of DALK, femtosecond assisted DALK, TILK, and more have inherent advantages that make them supersede older techniques of keratoplasty by far. Mastering DALK: A Video Textbook on Deep Anterior Lamellar Keratoplasty by Dr. Soosan Jacob combines the practical explanation of written text with the dynamic demonstration of surgical videos. From pre-operative to post-operative patient management and every surgical technique in between, this unique book and its included video website is a complete education on DALK. This includes the history and basics of lamellar keratoplasty, as well as tutorials on various surgical techniques currently in use, advice for complex situations, and management of possible complications. Each chapter includes high-quality photographs and illustrations and is paired with videos on the

accompanying website to demonstrate techniques and provide step-by-step instructions. The surgeries in these videos are performed and narrated by the same team of leading international experts who have also written all of the clinical tips, tricks, and pearls of wisdom throughout the book. Some videos include: Retrieving the Lost Bubble DALK Surgery with Type 1 Big Bubble Groove Peel DALK Femtosecond Laser Assisted DALK SMILE Away a Dermoid Any surgeon looking to add anterior lamellar keratoplasty to their practice will appreciate the digestible nature of Mastering DALK: A Video Textbook on Deep Anterior Lamellar Keratoplasty, which provides both the crucial detail of a book and the irreplaceable value of visual demonstration.

Smith and Aitkenhead's Textbook of Anaesthesia E-Book Jonathan Thompson 2019-04-09 This highly successful textbook is internationally renowned as a core text for trainee anaesthetists and is essential reading for candidates for the Fellowship of Royal College of Anaesthetists and similar examinations. The previous 6th edition was awarded First Prize at the BMJ Medical Book awards. The book provides full coverage of the sciences underpinning practice in anaesthesia, critical care and pain management together with details of clinical anaesthesia and perioperative care. In combining these aspects, anaesthetists new to the specialty have found the textbook particularly useful during the first few years of training as well as when preparing for professional examinations. It has also proved a valuable day-to-day reference for allied professionals such as operating department practitioners and physician assistants who need an understanding of clinical practice in anaesthesia and related specialties. The goal for this Seventh Edition has remained to

equip the reader with the basic knowledge and practical considerations required to administer anaesthesia and perioperative care for a whole range of surgical conditions in patients with all common medical comorbidities. Reflecting the expanding role of anaesthesia beyond the operating theatre it also includes essential material related to safety and quality assurance, consent, resuscitation, intensive care medicine, pre-hospital care and chronic pain management. This book's scope includes the full range of clinical practice, from anaesthetic equipment and pre-operative assessment through to post-operative care, local anaesthesia, anaesthesia for individual specialties and the management of chronic pain. The text covers the principles of pharmacology, anaesthetic agents and physics for the anaesthetist. Thirty new contributors provide a new perspective or contribute new chapters to this edition This edition has been restructured into four sections: Basic Sciences; Physics and Apparatus; Fundamentals of Anaesthesia and Perioperative Medicine; and Clinical Anaesthesia. Four new chapters have been added, both to reflect the UK postgraduate anaesthetic examination syllabus and changes in clinical practice. There are: The older patient; Anaesthesia in low and middle-income areas; Management of critical incidents; and Data analysis, clinical trials and statistics. This edition makes extensive use of new line drawings and diagrams and, for the first time, many of these are available in colour. Chapters have been extensively cross-referenced to aid the reader and avoid repetition to include substantially more information without increasing the overall size of the book.

Refractive Surgery Nightmares Amar Agarwal 2007 Even the most experienced refractive surgeon can encounter stressful situations in the operating room. Femtosecond Cataract Surgery Louis E. Probst 2012 Femtosecond cataract surgery is the next step in the evolution of cataract surgery. In Femtosecond Cataract Surgery: A Primer, Dr. Louis E. Probst and Dr. Clara C. Chan lead the way by bringing together current technology and clinical experience to provide a concise yet comprehensive overview on this ground-breaking technique. Femtosecond Cataract Surgery: A Primer is composed of clinical chapters written by 18 of the world's leading experts who have pioneering, hands-on experience performing the procedure paired with chapters on the technology of each of the 4 current systems. Intraoperative and clinical photographs further showcase the most up-to-date techniques and clinical experiences in each of the systems, as well as illustrations of their unique and common characteristics. Features include the following:

- New data presented in a companion table format to evaluate the different technologies
- Consistent representation of each system
- First-hand knowledge from expert international surgeons

Additionally, a comparison table has been constructed with the most recent information offering clear differentiation on the techniques and technologies of each system. The table also tracks each system's progression in the approval system in the United States and Europe. The final chapter in Femtosecond Cataract Surgery: A Primer serves as an update on the

current investigations of presbyopia treatment with femtosecond lasers. Providing a wealth of new data in a concise and organized format, *Femtosecond Cataract Surgery: A Primer* is an indispensable resource for ophthalmologists, cataract surgeons, optometrists, and other professionals in the eye care industry.

Textbook of Refractive Laser Assisted Cataract Surgery (ReLACS) Ronald R. Krueger 2012-11-29

Textbook of Laser Refractive Cataract Surgery is a comprehensive reference for the general ophthalmologist and cataract surgeon regarding the explosive new technology in femtosecond laser cataract surgery. Femtosecond laser allows extreme precision in surgery, and is used in refractive surgery and for 'cuts' in the cornea, leading to a more uniform treatment for the patient. *Textbook of Laser Refractive Cataract Surgery* is for cataract surgeons and all eye care providers managing or diagnosing cataracts who wish to be informed about this technology and its applications. Edited and written by recognized leaders in the field, this book covers background, technical, clinical, and commercial aspects of this exciting technology. Some of the topics covered include the evolution of cataract surgery, femtosecond laser fundamentals, challenges of femtosecond laser technology for cataract surgery, and the economics of laser cataract surgery. Femtolaser Cataract Surgery Federica Gualdi 2014-01-30 Cataract surgery is one of the most commonly performed procedures worldwide. In traditional cataract surgery, the surgeon uses

handheld instruments and a scalpel blade. This manual approach limits predictability and precision, potentially affecting visual outcomes and complication rates. Femtolasers allow surgeons to access and remove a cataract with far greater accuracy, much faster and causing little or no discomfort to the patient (Omni Eye Services). This book is a comprehensive guide to femtolasers in cataract surgery. The Art of Refractive Cataract Surgery Fuxiang Zhang 2022-06-02 The quintessential, reader-friendly guide to refractive cataract surgery (RCS) fundamentals An estimated 3.6 million cataract surgeries are performed annually in the U.S. Significant advances in IOL technology and techniques have been made in the last two decades. Concurrently, this has given rise to a growing desire among cataract patients to correct preexisting refractive errors with the goal of reducing or eliminating reliance on glasses/contact lenses. Recent surveys have shown that ophthalmology residents and many practicing cataract surgeons receive inadequate training in RCS, including astigmatism and presbyopia correction. The Art of Refractive Cataract Surgery: For Residents, Fellows, and Beginners edited by renowned cataract experts Fuxiang Zhang, Alan Sugar, and Lisa Brothers Arbisser fills a gap in the literature. This the first book specifically written for students, with uniquely focused chapters based on residents' and junior colleagues' questions and refined by their real feedback. Featuring contributions from a carefully curated team of distinguished refractive cataract surgeons, this reader-friendly book provides expert insights on essential principles and how-to surgical guidance for diverse types of premium IOLs. Clearly-defined basic and fundamental knowledge and applications provide ample inspiration for trainees and early-

career refractive cataract surgeons to ford the challenging river of learning curves. Each premium IOL chapter includes candidate selection criteria, contraindications, and evidence-based pearls to inform surgical decision-making, prevent complications, and improve patient outcomes. Key Highlights Twenty-three chapters cover a full spectrum of contemporary refractive cataract surgery topics, including Topography/LRI/Toric/MFIOL/EDOF/Trifocal/Monovision/Piggyback/ORI/FLACS Detailed prerequisite of surgical pearls helps ensure optimal outcomes for every cataract surgery More than 20 procedural videos provide clinical insights on specific techniques High-yield tables, charts, and illustrations enable rapid acquisition of key information The authors believe that this unique resource has great value for residents, fellows, and early-career refractive cataract surgeons who wish to incorporate this facet of ophthalmology into practice or improve their RCS skills.
