Flying Wings & Radical Things Anthony Chong 2016-06-15 John K. "Jack" Northrop and the company he founded in 1939, Northrop Aircraft, Inc., will be forever linked with the giant futuristic Flying Wings of the 1940s. But those iconic designs were not the only ideas to spring from the mind of this pioneering visionary and the innovative engineers who followed him. Many piston-powered and turbojet concepts, both conventional and radical in shape and purpose, were proposed and developed over the company's proud fifty-five year history. This book unveils Northrop's once-secret radical designs, many for the first time, with never-before-published drawings, models, and photos of such novel concepts as a ship-based vertical take-off and landing fighter, a supersonic intercontinental cruise missile, a rocket-boosted jet spaceplane trainer, and a radical combination truck/aircraft/boat cargo vehicle. Much of this material has only recently been declassified. Here for the first time is the untold story of Northrop's rare, unique, and formerly super-secret aircraft and spacecraft of the future. Featuring stunning original factory artwork, technical drawings, and never-before-seen photographs, this book shows an amazing array of radical high-performance aircraft concepts from Jack Northrop and his team of brilliant and innovative engineers.

Despite suffering setbacks in the summer of 1940 at the hands of the RAF, it continued to be used effectively in other theatres and roles until the last days of the war, particularly as a night fighter against RAF Bomber Command's strategic bombing campaign over the Reich. This title shows you how to correct and convert basic 1/48-scale kits of the Bf 110 into many different variants, using a wide selection of aftermarket detail sets, conversions, accessories and decals for both day and night fighter schemes.
